BATHROOMS AND BURLINGTON

Burlington enables homeowners to create bathrooms with the classic forms and finishes from the past but made to modern quality and performance standards.

Early bathrooms were fairly rudimentary affairs, with basins and toilets made from earthenware, baths in copper, tin or cast iron, and taps just simple brass castings. Then in the late Victorian period, improved plumbing and higher quality materials became available. During the Edwardian era, fitted indoor bathrooms began to appear in homes across the land, although it would be another 20 years or so before they became the rule, rather than the exception.

At the turn of the 20th Century, bathroom product design was still in its infancy, and form was still subservient to function. Shapes were square and geometric, with deep upstands on washbasins and large feet on pedestals. More rounded, opulent designs began to appear in the years immediately before the First World War, reflecting the art and architecture of that carefree, innocent time now known as la belle époque.

Burlington's designs have enabled homeowners to create bathrooms with the authentic outlines, forms and finishes of this pivotal period in history. The Victorian and Edwardian models faithfully capture the original designs in all their robust, timeless, seemingly everlasting glory. The Burlington Classic basin, for example, is a perfect reproduction of the 'Cliffe Vale' washbasin, originally produced in 1896. The Arcade collection recreates the more elegant, sophisticated designs that emerged during those peaceful, prosperous pre-First World War years, whilst the Riviera Collection offers precise, geometric forms and subtle linear detailing perfectly capturing the classic 1920s style.

In an age of minimalism and stark, functional spaces, Burlington offers a sanctuary for those who seek the comfort, familiarity and reassurance of more traditional styling. It's a great choice for renovation and replacement projects, and increasingly popular in new-build settings. As well as ceramic, baths and brassware, the range includes beautifully designed towel radiators, glass shower enclosures, accessories and furniture.

Burlington brings the finest quality complete traditional bathroom ranges with genuine and inspired designs from the late 19th Century through to the 1930s.

RUSTIC CHARM

Comforting. Warm. Organic.

Drawing on natural beauty, rustic bathrooms celebrate imperfections and welcome character into the home. A style where simple designs reign, rustic bathrooms unite stone, wood and other nature-inspired elements with a muted colour palette to bring individual charm. An enticing array of colours, textures and traditional fittings, rustic bathrooms effortlessly inspire comfort and contentment with their sense of familiarity.

WARMING NEUTRALS

Subtle. Soothing. Mellow.

Famed for their restorative properties, warming neutrals can help evoke positive emotions with their soft, balanced hues. A popular choice in classic and contemporary bathrooms alike, warming neutrals lay the perfect foundation for any era of design with a look that is set to remain timeless. A perfect pairing with expressive coloured finishes as much as minimalist designs, warming neutrals provide complete contentment without having to compromise on a look that dates.

TIMELESS GOLD

Opulent. Indulgent. Ornate.

Traditionally associated with power, wealth and success, Gold bathroom finishes hark back to Victorian and Edwardian eras to emphasise indulgence at its finest. Fast forward to recent years and Gold finishes continue to adorn bathrooms to this day, adding a warming touch to classic and contemporary settings alike. A rich and decadent colour, a Gold finish promises a sophisticated statement to complement a wide array of colour palettes.

INDULGENTLY CLASSIC

Elegant. Time-honoured. Traditional.

Known as the principles of art; balance, harmony and proportion are often cited within classic bathrooms inspired by eminent eras such as Victorian, Edwardian and Art Deco. Defined by symmetry, soft corners and structure, classic bathrooms maximise comfort with a look that's true to tradition. Embodying modern-day performance within a familiar look and feel, classic bathrooms unite form and function for elegantly refined designs.

REGAL WCs

At Burlington we've created a range that's taller than average sanitaryware. Regal WC pans are 60mm higher than the standard option.

At 480mm high the taller WC pan ensures the knee angle remains at approximately 90 degrees whilst in use, which is the correct seating position. The taller WC provides a more comfortable use for taller people and the elderly whilst ensuring your WC is functional as well as beautiful too.

BASINS

From large double basins to compact cloakroom options, Burlington offers a wide range of basins with many styles and sizes perfectly formed to suit your traditional bathroom. Selected ranges are also available in Jet and Medici.

STYLE OPTIONS

Burlington has a wide range of Basin options. Select your style below.

Classic

The Classic collection from Burlington is beautifully formed, available in rectangular or square designs, complete with an invisible waste option.

Edwardian

The Edwardian collection is the ultimate in traditional bathrooms with structured corners and angular designs, the feel is unapologetic and proud.

Victorian

Delicate and refined, the simplicity of this basin is stunning whilst its versatility allows you to continue the style through your home and brings an air of luxury.

Contemporary

As the name suggests, the Contemporary collection is styled on the elegance of past times but with a modern day twist. Simplistic, structured lines form the basis for this striking ceramic collection.

Cloakroom

A choice of traditionally designed cloakroom basins to achieve a consistent look throughout the home.

ADDITIONS

Some of our washstands have the option to add additional features including a towel rack or rail.

FURNITURE

A range of beautifully traditional furniture solutions to add classic style and sophisticated British elegance to your bathroom. Choose from freestanding in either square or curved design, cloakroom or fully fitted options to create the most functional space to suit your individual needs.

KEY FEATURES

Our furniture solutions are made from the finest materials and offer innovative features and smart details. Perfectly suited for the bathroom environment.

Classic

Chalfont

The plinths of the freestanding furniture are crafted from a waterproof high density material - providing extra protection and giving peace of mind that wet floors will not lead to damage.

Available in 4 sizes and 3 colours with the design option to have wall hung or floor standing by using additional legs available in wood with matching paint finishes or in brass with a Chrome, Gold or Nickel finish to compliment the Burlington brassware ranges.

Each of our Classic furniture pieces are prepared with 5 layers of primer featuring UV stabilisation to minimise colour fading from exposure to sunlight. The painted top coat is then applied for a glorious depth of colour.

All of our Chalfont furniture pieces have a high quality paint finish and are prepared with 3 layers of primer featuring UV stabilisation to minimise colour fading from exposure to sunlight. Followed by 2 layers of top coat for a glorious depth of colour.

Unlike conventional fitted furniture, our units offer full floor to height storage providing increased space for all your bathroom cosmetics and accessories.

Chalfont furniture units pair exclusively with Burlington's natural stone roll top basins. Natural stone's beautiful and tactile appearance is also extremely hard wearing and minor scuffs and scrapes are, in most cases, easily polished and smoothed away. These basins are supplied undrilled for your preferred choice of 1, 2 or 3 tap holes.

Minerva Basins

Minerva basins fit perfectly with your chosen furniture unit. Should you opt for a fitted furniture look, a Minerva worktop can be chosen to fit the length of your furniture units.

Tap holes

Minerva® worktops are supplied with an integrated bowl with overflow, and no tap holes. Tap holes are drilled by the installer in the required position and configuration. A template is provided with the Minerva® tops indicating tap hole positions and sizes.

Routine Cleaning

Minerva® does not require any specialist cleaning regimes, most dirt will easily wipe off with a damp cloth and soapy water. The work surface should then be rinsed with clean water and wiped dry. Persistent marks can be removed by using a mild abrasive cleaner, but harsh scouring powders should be avoided.

Staining

Minerva®, unlike marble and granite, is not porous and will resist most household chemicals including alcohol and cosmetics, however, some chemicals and strong dyes can cause damage and discolouration. If spillage occurs, wipe off immediately and rinse the area thoroughly.

Minerva® Care Kit

To restore your Minerva® work top to its original best use the Care Kit to buff out all tiny scratches and scuffs. The kit contains all the sanding / buffing materials and liquids required.

PAINT YOUR OWN

Should you wish, our Matt White furniture is supplied ready for you to paint, so you can transform your entire bathroom into your individual colour scheme. We've chosen some Farrow & Ball colours as suggestions displayed below. We recommend using a water based primer before an egg shell paint finish for the best effect.

BRASSWARE

Burlington brassware can be customised with a choice of 4 tap heads; Claremont, Birkenhead, Anglesey and Kensington.

We supply every tap with two Neoperl devices: A flow straightener, which is for use with low water pressures and an aerator, which is for use with high water pressures.

KEY FEATURES

Burlington brassware products have a range of key features across basin and bath taps, shown below.

Swivelling Spouts

All our bath fillers and bath shower mixer spouts swivel - so you don't have the spout in your way when you shower.

Angled Mixers

All our bath shower mixers are available in an 'angled' version.

S Adjuster

The S adjuster allows the telephone handset to be positioned over the bath. The bath shower mixer can be installed with or without the 'S adjuster'.

Bridge Mixers

Our bridge basin mixer has a swivelling spout and allows you to have mixed hot & cold water, whilst using a two taphole configuration.

Normal

Burlington

Spouts

Normal: The underside of a bath spout of a normal, traditional bath tap.
Burlington: The underside of a Burlington bath tap with a Neoperl aerator.

STYLE OPTIONS

Choose from a wide range of tap head options in finishes of either Chrome, Gold or Nickel and choose from a range of indices in White, Black and Medici or a Kensington Walnut tap head lever.

REGENT

Our regent base can be used on all one, two and three tap hole taps (excluding Chelsea, Stafford and CL45-QT) offering an extra 30mm of height than the standard tap base and a further 30mm away from the wall when wall-mounted.

For the full range please visit the website.

Standard Regent

WATER PRESSURE

Our taps are designed to deliver the following maximum flows of water, regardless of the incoming water pressure:

Basin taps: 13L per minute

Bath tap: 14L per minute

Bath shower mixer: 22L per minute

Normal tap

Water flow in a normal traditional tap.

Low pressure

Low pressure water flow with a Burlington tap using a flow straightener.

High pressure

High pressure water flow with a Burlington tap using an aerator.

SHOWERING

Our range of showers provide extensive options to create a perfect showering solution. Whether you prefer showering over a bath or within an enclosure, our range of thermostatic valves offer safe and controllable showering for the entire family. Partner with a wide range of enclosure styles with corresponding trays.

KEY FEATURES

All our showers come as standard with the below key features.

One Way Water

Our non-return valves ensure the flow of water in only one direction, ensuring heating efficiency, preventing siphonage of contaminated water and keeping your shower cartridge in excellent condition for longer.

Airburst Shower Heads

By combining air and water, the pressure inside the shower head is increased. The power of a traditional shower head with up to 33% water saved.

Thermostatic Showering

Within the valve there is an automatic adjuster which maintains temperature by adjusting the flow of each supply. This is useful in guarding against the possibility of scalding. If for instance, someone flushes a WC whilst you are showering, the flow of hot water will immediately be closed down to compensate for the reduced cold water flow.

STYLE OPTIONS

Our showers are available with concealed or exposed valves.

Concealed

A concealed shower valve creates a clean finish as the valve is hidden behind the wall.

Exposed

An exposed shower valve is fitted onto the wall and has a more traditional feel.
